Loft Series.

Inner-city sophistication

Exposed steel structural beams tinged with rusty bronze; polished concrete floors; bare brickwork; statement industrial downlights—these are the key ingredients in the Loft series' inspiration. But while Loft takes design cues from the heart of 1980s New York, it's a style that's equally at home in the heart of the suburbs.

Loft blends classical and contemporary influences to offer a bold visual statement. The criss-cross grid design clearly captures the modern ethos of industrial warehouse living, but it's actually a traditional window styling that originated in vintage country farmhouses. Loft-style living is all about flexibility and freedom, and with a variety of style influences drawn from both modern and classic interiors, so too is the Loft series.

Please Note

Bars are evenly spaced based on the overall height and width of the product, not the glass area, to ensure bars align across products of the same dimensions regardless of the sash type. Products with a transom are the exception, where by bars are evenly spaced within the glass openings.

Please consider other nearby products, as they may need to be customised if you wish for all bars to align.

Please discuss your specification with an A&L sales representative to ensure your desired aesthetic can be achieved.
